

Style Guide

Expert responsive web app - **PRO**

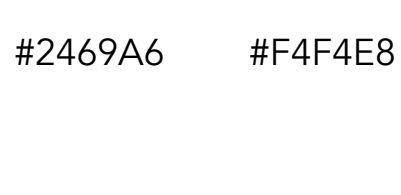

About

By Following the design language, we can ensure consistency through the whole project. Our goal is to provide a user-friendly experience and intuitive interface for the users so that they can explore the applicant without any difficulties and make sure they can resolve their concerns every time they reach out to our experts.

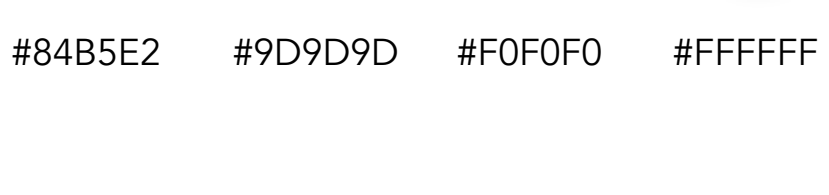

Colors

Use the darker shade of blue to represent its trust and safety and the light shade of yellow for the background to bring the contrast.

Primary

Secondary
